

Dear student,

Are you conducting (bio)medical research and are you interested in presenting your work on an international platform? Or are you simply interested in learning about the latest (bio)medical research?

The International Student Congress Of (bio)Medical Sciences (ISCOMS) is one of the world's leading student congresses in the field of (bio)medical sciences. Last year, over 600 students from more than 60 countries attended the 31st edition of ISCOMS. This year's 32nd edition of ISCOMS will take place from the **2nd to the 5th of June 2025** in Groningen, The Netherlands.

Students can visit the congress either as a presenting or as a non-presenting participant. ISCOMS offers a scientific programme with a pre-course to master your research skills, student presentation sessions (plenary, oral, and poster), workshops and an operation. You can also acquire information on working and conducting research in Groningen during our network lunch, which gives you the opportunity to integrate with companies interested in recruiting ambitious (bio)medical students.

On top of all this, ISCOMS 2025 will feature an exciting social programme, including a formal dinner, the amazing World Wide ISCOMS Night and the Post Congress Tour.

CALL FOR ABSTRACTS

Are you interested in presenting your research at ISCOMS? Submit your abstract now! **The abstract submission is open now** and abstracts can be submitted until 19th January 2025. Please note, we cannot accept case-studies, reviews and literature studies (except for meta-analysis). To submit your abstract, or for more information about the abstract requirements, please visit our website: <https://www.iscoms.com/abstract-submission/>

For more information about ISCOMS, please visit our:
